AI

First Solution in Weeks

1-3 Weeks

We turn our clients' ideas into an initial working solution within the first 3 weeks, ensuring quick progress and early feedback for refinement.

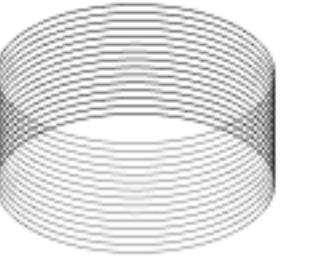

Save up to 30%

30%

Working with us is a cost-efficient solution, saving you up to 30% compared to hiring and managing an internal development team

Creating a product is more than just development.

We guide you through every step to ensure you achieve your goals.

1

Research & analysis

We dive deep into understanding your business, goals, and target audience.

This phase ensures we create a solid foundation for the product

2

Product design

We focus on crafting a design that provides a clear visual representation of the product.

Bringing ideas to life and setting the stage for development.

3

Product development

We code the product based on the requirements, building both the frontend and backend.

This insures delivering a fully functional, launch-ready solution.

4

Product launch

We present a demo to the client and assist with publishing the product.

This includes connecting the domain, configuring hosting, and ensuring everything is set for a smooth launch.

5

After release

We handle improvements based on analytics, user feedback, and business goals.

We're ready to maintain and scale the product with you.

Ubit Card

Token mining

Smart Loans

CRM Web Fintech B2B2C

An all-in-one loan origination system that streamlines the lending journey from application to funding, powering a best-in-class experience for borrowers.

Technologies:

React Recharts Shadcn Kotlin Spring Boot 5

Spring Webflux jOOQ Reactor Feign MySQL

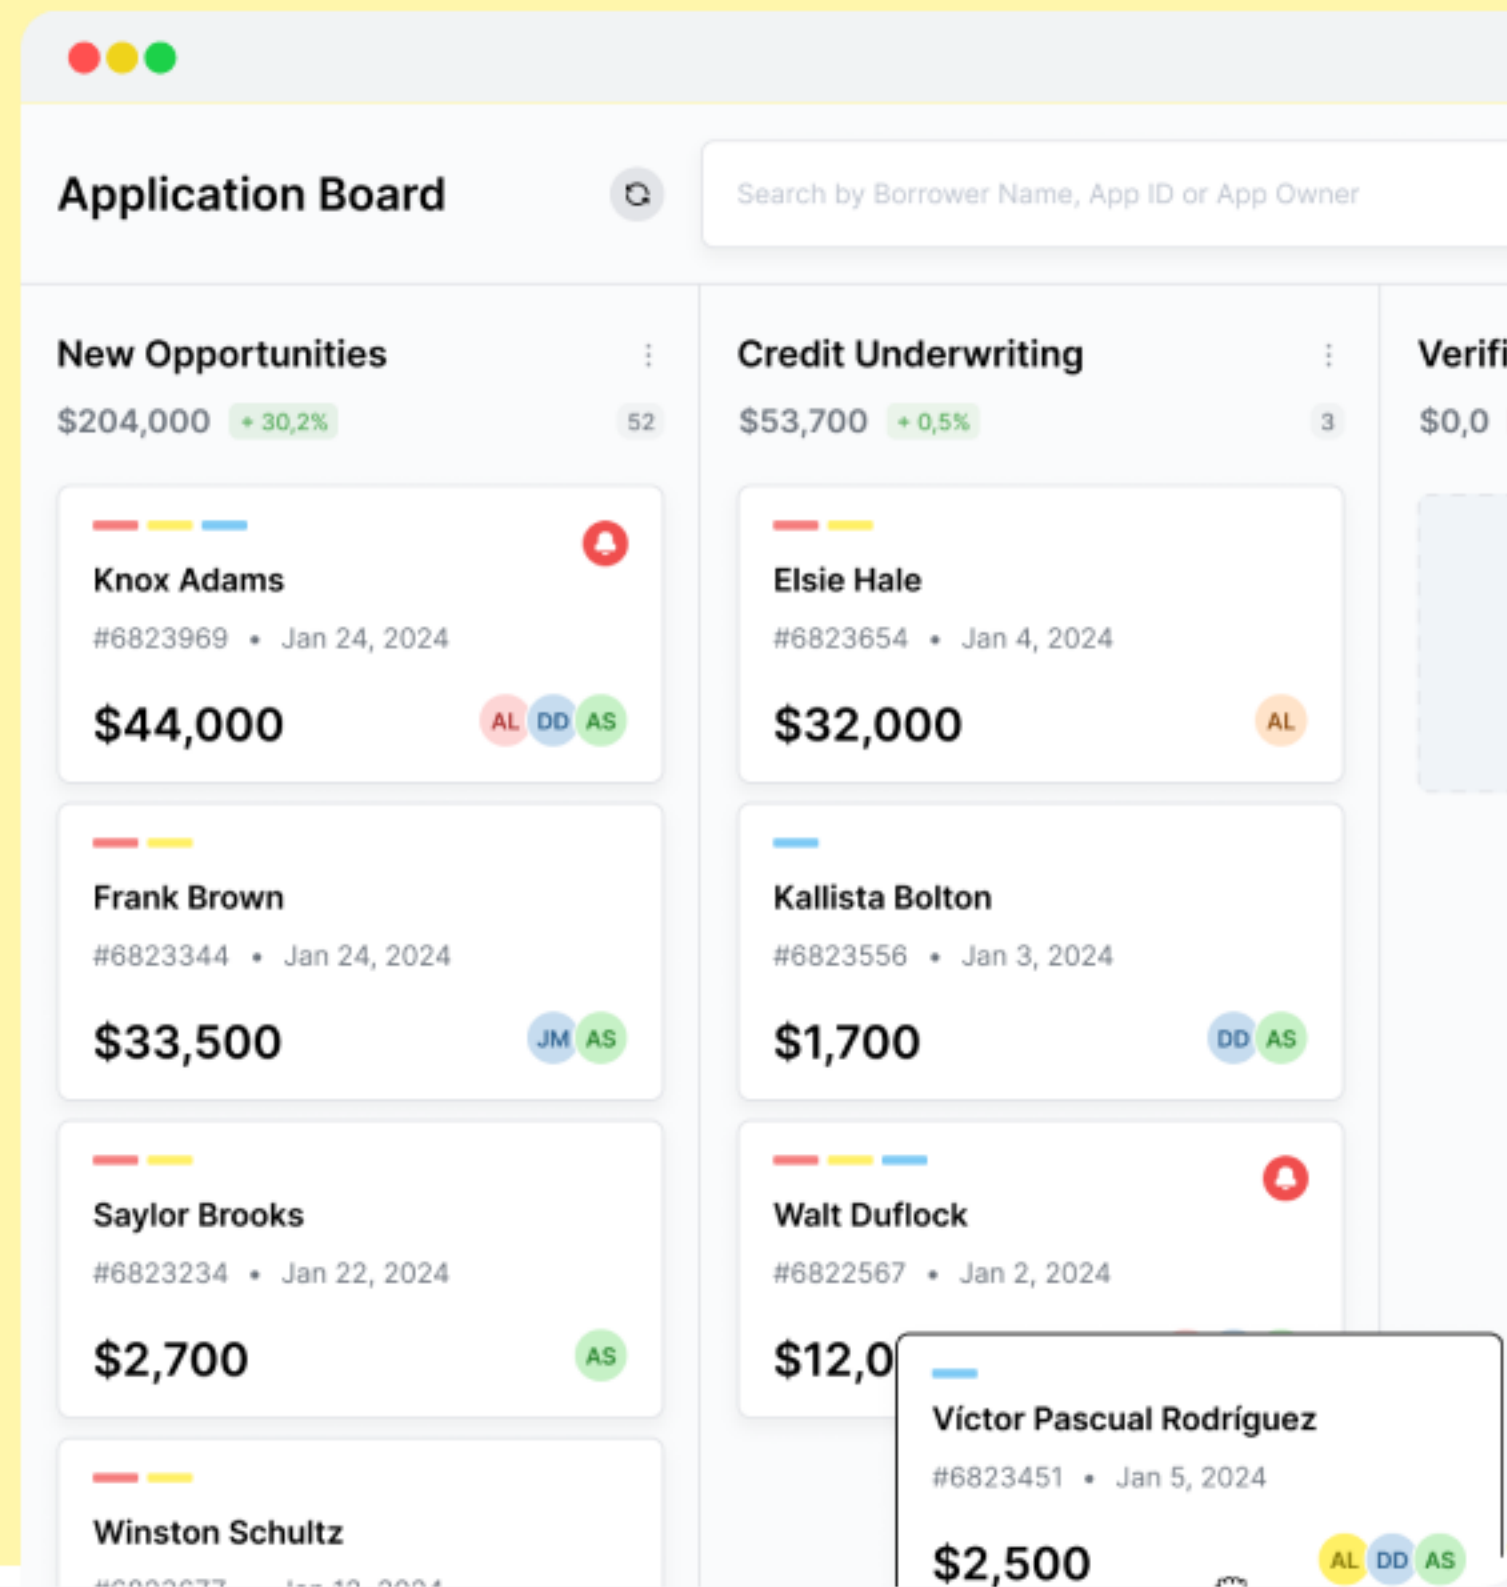

MongoDB Redis RabbitMQ Groovy DSL

The screenshot displays a user interface for a loan origination system. On the left, a profile card for 'Stephanie Waldeck' shows contact information: Email (windustries@gmail.com), Phone ((307) 963-4754), and ID Number (684-11-0032). Below this is a list of 'Applications' with 6 items. The first is a 'Mortgage' for \$32,000, dated Jan 4, 2024, with a 'Rejected' status and a 'DL' icon. The second is a 'Personal Loan' for \$6,500, dated Jan 4, 2024, with a 'Verification' status and an 'AL' icon. The third is a 'Mortgage' for \$28,000, dated Jan 4, 2024, with a 'Final Review' status and a 'DD' icon. The fourth is a 'Mortgage' for \$28,000, dated Jan 4, 2024, with a 'Rejected' status. On the right, a 'Personal Loan' details card for application ID 68-22-003 shows 'Verification' status, 'High Priority', and 'Phone Lead' tags. It lists 'Application ID' (68-22-003) and 'Application Date' (Jan 19, 2024, 12:02 PM). Below this is a 'Documents' section with a search bar and a table listing various documents like 'Bank Statement_2024', 'Proof of Address_Bank Statement', 'Proof of Identity_Driver's License', 'Income Verification', 'Credit Report_2023/2024', 'Loan Disbursement Instructions', and 'Collateral Agreement'. A user 'Jennifer Nixon' is listed at the bottom right.

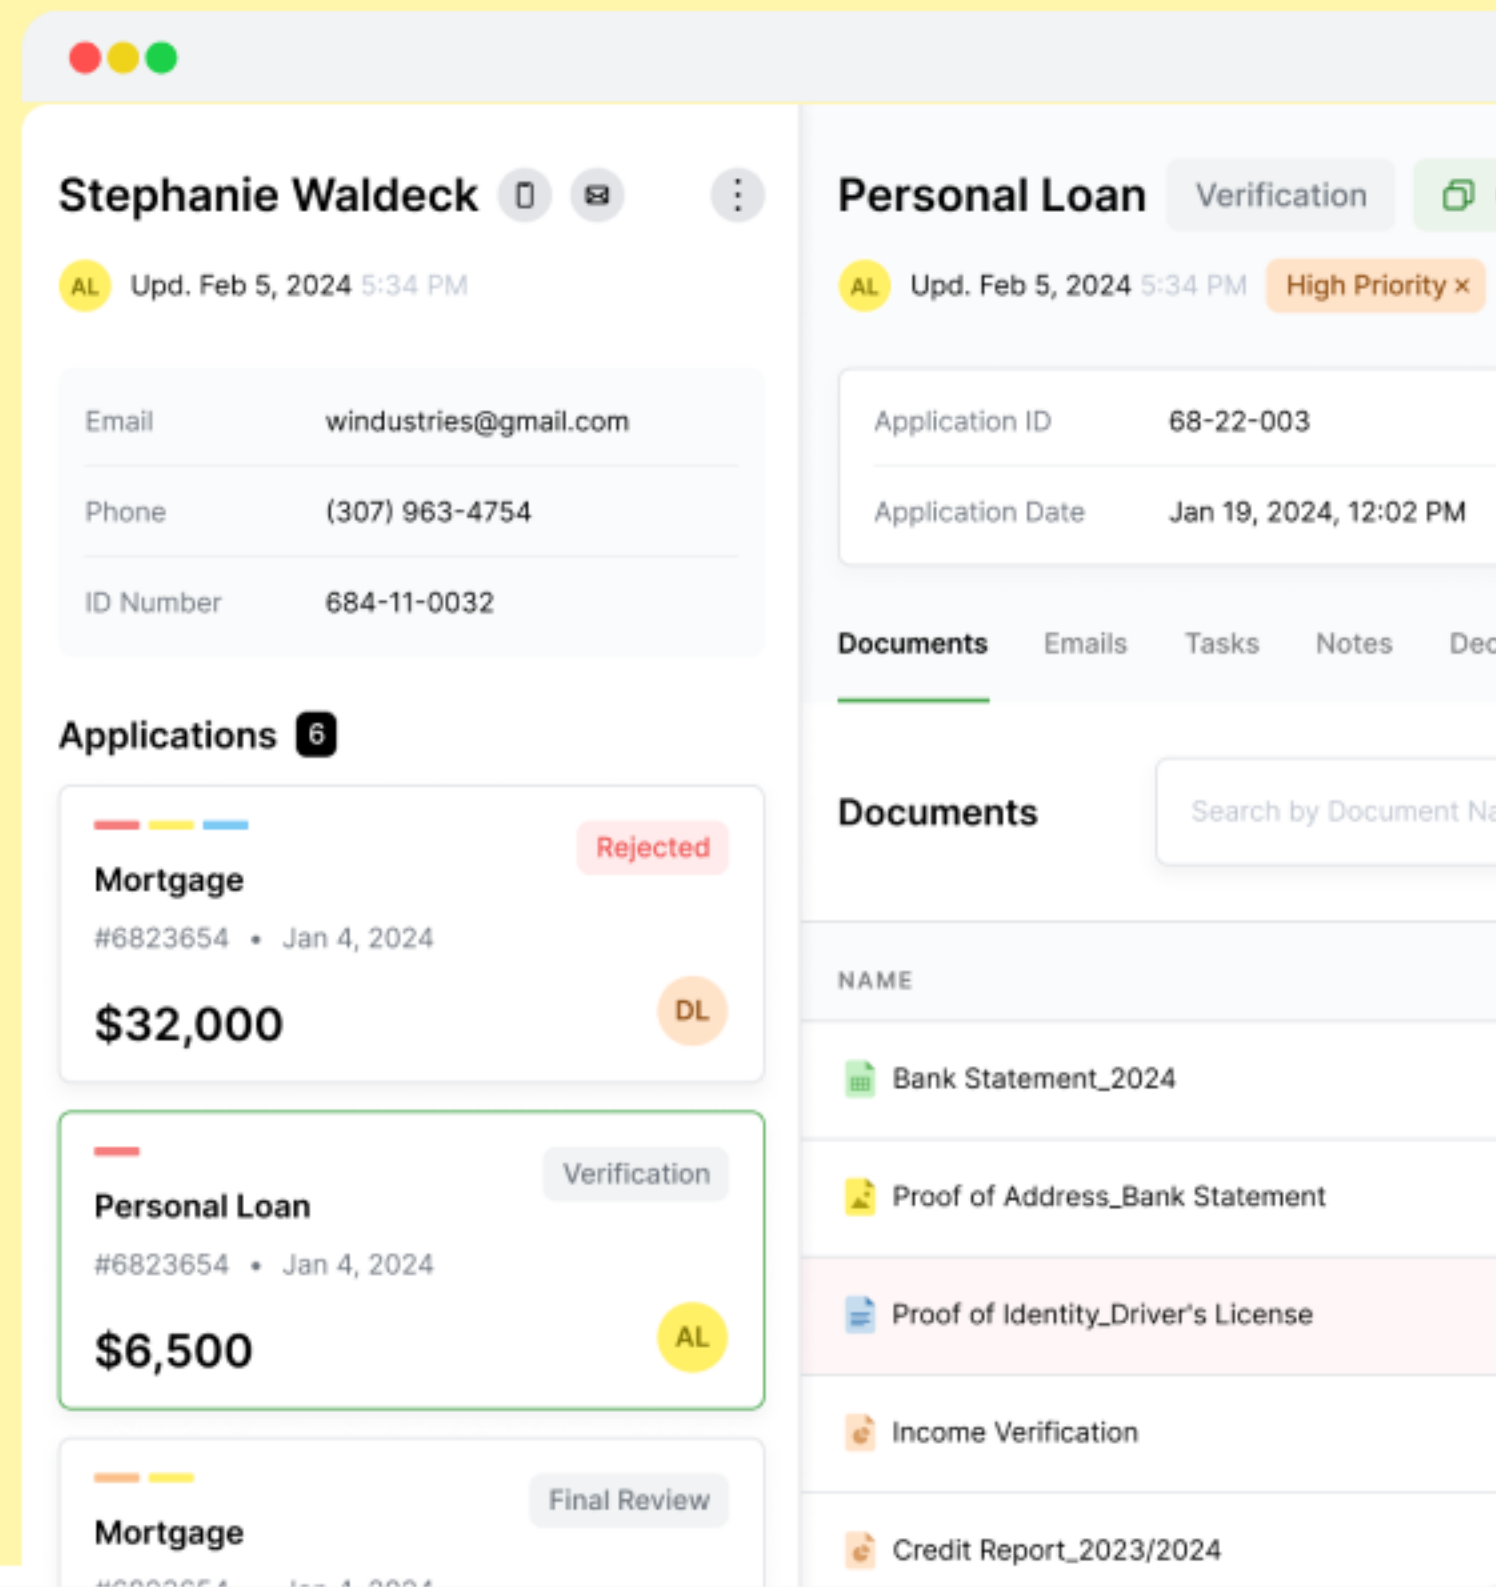

Complete Loan Management System for Lenders
